ABOUT THE COLLEGE

The Government Intermediate Science College, Mandya was established in 1948 with a broad view to provide higher education to rural masses at affordable cost and convenience. The growth of the college both in strength and quality was so enormous that it was split into two colleges - Govt. College for Boys, Mandya and Govt. College for Women, Mandya, in the year 1969. In the year 1997 it was de-linked from Pre-University course. At present the college is a centre for Degree and PG level education affiliated to the University of Mysore, Mysore. In the year 2005 the college was accorded Autonomous Status and in the year 2007 it became a co-education centre and as such the name of the college has been changed as "Government College, Mandya" (Autonomous)

ABOUT THE DEPARTMENT OF COMPUTER SCIENCE

The Department of Computer Science started in the year 1996-97. PMCsis one of the major combinations in our college. The Department of Computer Science along with its Computer Club is actively engaged in organizing seminars, workshops, orientation programmes, and quiz to upgrade the knowledge of Computer Science and Information Technology among the students and staff members of the college. Faculty members of the department are also engaged in research programmes.

The Department of Computer Science is well established with high tech laboratories to enable the students and staff to equip with modern technologies. The Department is pleased with the University Grants Commission (UGC) for sanctioning Career Oriented Programme(COP) during XI Plan period for conducting certificate courses in Computer Networking for science students. The Department has the privilege to become an Institutional Member of Computer Society of India.

VISION

- Educating a larger section of rural youth.
- Providing an opportunity on socially equitable footing.
- Mould men of both competence and compassion who can successfully take on the challenges of contemporary socio economic, cultural and political set up.

MISSION

Provide the best possible education for the talented young people and to prepare them to actively contribute to the society and the country at large.

GOALS

- Inculcate a thirst for knowledge.
- Equip the students for leading a successful life.
- Empower them intellectually to become leaders in various fields

OUR STRATEGY

We aim to achieve the goal through concerted efforts on the part of teachers and students through value-based interactions.

ABOUT CONFERENCE:

As we entered the 21st Century, the realm of electronic communication, which encompass Telecommunication, Broadcasting, Information Technology has enabled services in industries, is undergoing profound changes leading to Global Information Infrastructure (GII), which will be capable of carrying any type of Information. Information Communication Technology is increasingly becoming a powerful tool for development of a Nation. As India is emerging as an IT Superpower in the world, it is our responsibility to think on the advancement in this area.

Information Technology (IT) skill standard provides a common language for industry & education. It provides increased portability depending on attitude and performance of the professionals. The industry recognizes IT education programs that build competency among the academicians to perform best in the new emerging areas of Information Technology like Biometrics, Knowledge Management, Mobile Computing, Grid Computing, Parallel Computing, Embedded Systems, Nanotechnology, etc. Hence this National conference is organized to bring together leading academicians, industry experts and researchers to facilitate personal interaction; and discussions on various aspects of Information Technology. It also aims to provide a platform for the academicians to express their views about the recent trends in Information Technology with interaction and exchange of ideas among the academicians and researchers.

In view of this Technical/research papers are invited from the students/Research Scholars /academicians/industry persons on the following topics but not limited to...

1. Biometrics
2. Data Communication & Security
3. Digital Signal & Image Processing
4. Human Computer Interaction
5. Embedded Systems
6. Knowledge Management
7. Grid Computing
8. Nanotechnology
9. e-learning
10. Parallel Computing.
